8000 α Hybrid™

VITAMIN D
FOR YOUR LIFE

Starting into a New Age of Technology

Thanks to its unique selling point of “Smart Technology” and its 12-inch touch display, our new flagship megaSun 8000 alpha deluxe HybridST is setting new standards for sunbeds worldwide.

Intuitive Interface

The menu layout in the 12-inch touch display offers a clear choice of all pre-adjustable functions. On the one hand for your customers who can choose “their” sun, e.g. “Basic”, “Mediterranean” or “Caribbean”, as well as ventilation, aroma and many more features. On the other hand, the service layer offers very comfortable control of all system settings of the sunbed for the operator.

Efficiency by Simplification

For a quick overview of the display, all functions are presented individually in both words and pictures. Operation is similar to the familiar handling of a smart phone or tablet. As a result, you have a very comfortable and uncomplicated on-site access to all essential data and can control individual features directly.

Hybrid Technology

This technology intelligently combines the best from different light worlds in just one apparatus. Sunlight is combined with a very special beauty kick and, as such, ensures not only intensive tan but also silky skin and a perfect complexion. In addition, 60 ruby-collagen-boosters provide the sensitive skin parts in the areas of face, décolleté and legs with moisture, thus revitalising, relaxing and detoxing them. Pure beauty and tan!
