Tanning presets

Audio settings

DekoLight scheduling

DekoLight / Matrix LED settings

Remote software update

Device restart

Media upload

Web radio settings

Free

Premium

The communication platform for your tanning units.

CONNECTIVITY +

YOUR STUDIO. YOUR CONTROL.

THE DIGITAL TWIN

Connectivity+ connects your megaSun solariums to the future: The cloud-based platform for all devices with KBL8 software* gives you convenient remote access to your entire device portfolio. Manage studios and solariums centrally, monitor device status in real time and identify action needed immediately – via PC, tablet or smartphone. This feature requires a stable internet connection for the solarium via Wi-Fi or LAN.

REMOTE CONNECT

Organize your solariums. Set up devices by studio branches or zones. Get a clear, logical overview of your studio structure at a glance.

Remote updates. See when a new software version is available for a device. Avoid service visits by instantly identifying outdated software versions.

Real-time device status. Instant visual feedback shows whether a device is online and ready for operation.

Status:	Running
Runtime:	19 min
Program:	Styling
